Samanta Uchôa Bordallo

DevOps Engineer

bordallo.samanta@gmail.com • +351 913 890 678 • GitHub • LinkedIn

SKILLS

- **DevOps & CI/CD:** Azure DevOps, Jenkins, CI/CD Pipelines, Release Engineering, Deployment Automation
- **Programming:** Python, C#, REST APIs
- **Cloud & Infrastructure:** Docker, Deployment Agents, Proxy Configuration, Environment Management
- **Databases:** PostgreSQL, MySQL, SQL Server
- **Monitoring & Tools:** Grafana, Git, GitHub, Selenium
- **Methodologies:** Agile, Scrum, Kanban

EXPERIENCE

Bosch Service Solutions Nov 2025 - Nov 2026

DevOps Intern

- Designed, built and maintained CI/CD pipelines using Azure DevOps and Jenkins.
- Developed Python automation solutions for development, deployment and release workflows.
- Managed deployment agents, containerized environments, proxies and infrastructure configurations.
- Investigated and resolved deployment failures, pipeline issues and production incidents.
- Improved software delivery reliability, release efficiency and operational stability.

Playads.io 2024

Python Developer Intern

- Developed Python automation scripts for social media platforms including Pinterest and Facebook.
- Implemented web scraping solutions and automated publishing workflows.
- Integrated AI APIs for image generation and automation processes.
- Optimized repetitive business workflows through automation.

KEY PROJECTS

Release Delivery Time Dashboard

Designed and developed a dashboard used to track software release metrics and delivery performance. Automated data collection, processing and visualization to support engineering and management decisions.

Technologies: Azure DevOps, Python, SQL, Grafana

CI/CD Pipeline Automation

Designed and implemented deployment pipelines, reducing manual work and improving release consistency across development workflows.

Technologies: Azure DevOps, Jenkins, Git, Python

Development Workflow Automation

Developed Python tools for recurring DevOps and engineering tasks, automating validation, data processing and internal workflows.

Technologies: Python, REST APIs, Docker

Production Incident & Pipeline Troubleshooting

Analyzed and resolved pipeline failures, deployment issues and infrastructure-related incidents, improving software delivery reliability.

Technologies: Azure DevOps, Jenkins, Docker
